PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 12+ years of experience in web and enterprise application testing. Strong expertise in UI and API automation using Selenium, Cypress, Playwright, and Gauge with Taiko. Experienced in automation framework design, legacy test migration, Salesforce testing, and basic accessibility validation. Skilled in BDD-based test design and maintaining stable regression suites in Agile environments.

WORK EXPERIENCE

Senior QA - OpenText (formerly Micro Focus) — Bangalore

Jul 2022 - Present

- Designed and implemented automation framework using Playwright with Gauge for selected modules.
- Migrated 200+ legacy Selenium test cases to Playwright using AI Copilot and refactored them to align with framework standards and improve stability.
- Reduced regression execution time by 25% through framework optimization and improved test structuring.
- Maintaining and enhancing automation scripts using Cypress for enterprise monitoring application.
- Defining and refining QA processes and best practices to improve test consistency and coverage.
- Reduced flaky test failures by 30% by identifying instability causes and refactoring automation scripts.
- Preparing and refining test scenarios using AI tools to improve coverage and clarity.
- Developed reusable test components and structured specifications to improve regression maintainability.
- Performing keyboard navigation and basic accessibility validation during functional testing.
- Conducting detailed test case reviews to ensure requirement traceability and functional completeness.
- Performing automation code reviews to maintain quality, reusability, and adherence to framework standards.
- Creating logical tagging mechanisms for better test organization.
- Preparing and maintaining project documentation and wiki pages.

Lead QA Engineer - Wipro Technologies — Bangalore

Nov 2020 - Apr 2022

- Developed UI automation using WebDriverIO.
- Performed cross-browser exploratory testing, identified critical defects.
- Mentored junior QA engineers and improved automation coverage.
- Performed functional and regression testing.
- Conducted API testing using Postman.
- Logged and tracked defects using Jira.

QA Application Programmer- Randstad (Telstra Singapore) — Singapore

Nov 2017 - Oct 2020

- Designed and implemented automation framework using Gauge with Taiko.
- Engaged in sprint planning, defect triaging, and stakeholder demos.
- Delivered automation scripts within the sprint cycle.
- Performed Salesforce application testing including workflows and role-based validations.
- Wrote BDD test scenarios and maintained regression coverage.
- Tested end-to-end business flows within Salesforce environment.

Lead QA - ProKarma SoftTech — Hyderabad

Jun 2017 - Oct 2017

- Migrated legacy tests to modular BDD scenarios.

- Enhanced suite stability by resolving flaky test issues.

Lead Product Engineer - Harman Connected Services — Bangalore

Dec 2011 - Mar 2017

- Created BDD-based automation scripts for infotainment systems.
 - Led UAT cycles and earned the “Extra Mile” Award 3 times.
-

EDUCATION

Master of Computer Applications (MCA) | All Saints PG College | 2005 – 2008

Bachelor of Science in Computer Science | Andhra University | 2002 – 2005

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript
- **Automation Tools:** Selenium WebDriver, Cypress, Playwright, WebDriver.io
- **Frameworks & BDD:** Cucumber, TestNG, JUnit, Gauge with Taiko, Playwright with Gauge
- **API Testing:** Postman (Manual and Automation), REST API Testing
- **Salesforce Testing:** Functional Testing, Workflow Validation, Profiles and Permission Testing, Reports and Dashboard Validation
- **Accessibility Testing (Basic):** Keyboard Navigation Testing, Tab Order Validation, Focus Handling, Color Contrast Validation, Basic A11y Checks
- **Test Design & Documentation:** BDD Scenario Writing, Matrix-Based Test Case Preparation, Test Case Preparation using AI tools
- **Tools:** Jira (JQL Dashboards), Zephyr, JMeter (Basic Knowledge), Burp Suite (Basic Knowledge), Git
- **Methodology:** Agile
- GitHub Actions (Basic)

GitHub Projects

Portfolio Website: <https://chaitanyavn-portfolio.vercel.app/>

PlayGauge Automation Framework

GitHub: https://github.com/chaitanyavn9/playgauge_framework

- Built enterprise-grade automation framework using Playwright + Gauge + TypeScript with modular, reusable architecture
- Integrated Allure reporting and observability telemetry for scalable, data-driven test execution
- Designed AI-powered failure analysis pipeline to categorise and debug flaky, network, and environment failures
- Demonstrates modern SDET capabilities: maintainability, stability, and faster regression execution
